## **Carrier AquaEdge® 19XR, 23XR and AquaForce® 30XV and XA Chillers are Available With Lower Global Warming Refrigerant Solutions**

*Legacy R-134a as well as the newer R-513A refrigerants are both supported in Carrier chillers*

**CHARLOTTE, N.C., Feb. 09, 2018** — As part of Carrier’s commitment to delivering a comprehensive commercial product line that supports the drive for lower global warming refrigerant solutions, Carrier AquaEdge® 19XR water-cooled centrifugal chillers, 23XR water-cooled screw chillers and AquaForce® 30XV/XA air-cooled screw chillers are compatible with both R-134a as well as lower global warming potential (GWP) option R-513A. Carrier, a world leader in high-technology heating, air-conditioning and refrigeration solutions, is a part of UTC Climate, Controls & Security, a unit of United Technologies Corp. (NYSE: UTX).

“Our customers rely on Carrier for quality, reliability and predictability and they will be pleased to know our AquaEdge 19XR and 23XR water-cooled chillers along with our AquaForce 30XV/XA air-cooled chillers are able to transition smoothly from R-134a to lower GWP R-513A at the same time we pursue the development of other low global warming refrigerant alternatives,” said Chris Opie, director, North America Commercial Marketing.

“We believe R-134a will continue to provide the best combination of availability, cost, performance and safety for many years to come. The ability to convert our R-134a centrifugal chillers to lower GWP R-513A provides owners and facility managers even greater options that ensure the full useful life of this chiller,” Opie added.

For more information on Carrier chillers, please contact your local Carrier expert or visit [carrier.com/commercial](http://carrier.com/commercial).

ASHRAE® is a registered service mark of the American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.

### **About Carrier**

Founded by the inventor of modern air conditioning, Carrier is a world leader in high-technology heating, air-conditioning and refrigeration solutions. Carrier experts provide sustainable solutions, integrating energy-efficient products, building controls and energy services for residential, commercial, retail, transport and food service customers. Carrier is a part of UTC Climate, Controls & Security, a unit of United Technologies Corp., a leading provider to the aerospace and building systems industries worldwide.
